

Spring bayonet head **now** made of aluminium.

Precision...

... even at great working heights. A **large catch funnel** ensures easy threading of the spindle shaft, even if the conductor connection terminal is several metres above the ground.

Universal application.

The spring bayonet head fits all conductor connection terminals with **spindle shafts** in accordance with DIN 48087.

Lightweight yet robust construction.

Rough operating conditions do not require heavy equipment. **Simple and easy handling** on site is the key here.

Areas of application

Optimal and safe performance:

- For use at great heights
- In backlight and glare from the sun
- With strong cross loads due to high wind loads, sudden gusts and rain
- Available for all earthing rods > 1 kV

Technical specifications

Features

Parameter	Value
Diameter of the funnel	58 mm
Total length	79 mm
Shaft length	42 mm
Material	Aluminium alloy
Spindle shaft standard	DIN 48087

Unlike standard bayonet heads, the ARCUS aluminium spring bayonet head has a significantly larger diameter.
